

UNMISTAKABLY BOLD

Making a striking design statement is now simpler than ever. Choose from surface or suspended mounting, broad straps and four big, bold luminaires. The Tangram family offers latitude for configuring lighting and geometries.

WON OVER

With its innovative design and impeccable craftsmanship, Tangram has emerged as a winner of 5 prestigious lighting design awards. All awards won by Eureka products can be viewed [here](#).

BOLD STROKES

With its flat power cable fully concealed inside its strap, designers are empowered to invent their own visual language without suspension cables and fasteners in the way. Tangram offers absolute control over the mood and feel of a space.

ILLUMINATION GAME

Four luminaire personalities give designers ample room to maneuver. **Tangram-Trace** linear modules offer clean lines and a sophisticated presence. **Tangram-Tact** adds classic curves and a softer note. **Tangram-Essential** brings compact functionality to a space. **Tangram-Cut**'s machined glass is the epitome of luxury. With Tangram, diversity is strength. Any way you choose to play it, straps pull it all together.

LIGHTING BENEATH THE SURFACE

Adaptable to a space's design needs, these luminaires complement Tangram's suspended-mount options for a unified look or become the focal point with their striking decorative finishes.

Clear Glass

Frosted Glass

TANGRAM-CUT

Precision machining from a block of solid glass gives the Tangram-Cut pendant its luxurious, jewel-like quality. Internal frosting and a distinctive concave bottom further diffuse light.

Depending on finish of glass – frosted or clear – and output option selected, output ranges from 1,216 to 2,500 delivered lumens.

BAND WIDTH

The premium look and rich feel of the Tangram-Cut pendant help define luxury in high-end hospitality spaces. When connected with the overwide straps seen in their various perspectives, the overall effect is something unique.

TANGRAM- ESSENTIAL

Compact power that's beautiful and functional. Honeycomb or prismatic lenses span Tangram-Essential fully, giving each 8-inch cylinder great visual impact.

Depending on the output option and honeycomb color selected, output ranges from 496 to 2,690 delivered lumens. For the prismatic lens option, low, regular, and high output options range from 1,857 to 3,977 delivered lumens.

SPACE MAKER

Configured and suspended in endless ways, Tangram-Essential brings geometric interest to lobbies and informal lounge or meeting areas. The classic luminaire form punctuates each design statement created by the straps.

TANGRAM-TACT

Tangram-Tact's warm and soft curves are a friendly and welcoming addition to a space. Even with the strapping's strong lines, they assert their presence.

Designers can choose a 25-degree or 60-degree beam angle, and optical accessories include a honeycomb louver or a clear glass lens option.

Low, regular, and high output options range from 1,537 to 3,318 delivered lumens.

COFFEE	2.5	LATTE	4
ESPRESSO	2.5	MOCHA	5
MACCHIATO	3	HAND-POURED COFFEE	5
CAPPUCCINO	3.5	TEA	3.5

SWEET SPOT

COB (chip on board) LED light source allows the Tangram-Tact pendant precise focusing ability, useful for defining seating areas or illuminating pathways and corridors. The light source's deep position within the 12 inches diameter shade reduces glare, and increases user comfort.

TANGRAM-TRACE

With Tangram-Trace, construction details are muted, so the visual flow from strap through fixture is smooth and effortless, even when viewed from above. The look is pure modern sophistication that confidently defines a space.

With a 1.1-inch profile, Tangram-Trace offers a rich illumination, a quality not often found in luminaires so thin. Low, regular, and high output options range from 670 to 1,027 delivered lumens per foot.

Available in 2', 4' and 6' lengths.

The premium prismatic lens relates texturally to the strap material, providing luxuriously diffuse light.

HIGH DRAMA

Tangram-Trace stands out in applications where the straps can paint a bold picture, strongly differentiating a space. Perfect for conference and executive areas, hospitality applications and reception space.

Products shown: Tangram-Trace, L06 and modified L07 configurations

Whether you look for convex or concave forms, matching or complementary, with Tangram-Trace, latitude is the name of the game.

GAME PIECE

With Tangram the canopy is not something you hide, it's a design tool you can play with. Straps can be made to appear to flow discreetly out of the ceiling, or canopy elements can mirror and amplify the geometry suspended below. It's your play.

Products shown: Tangram-Trace, 74280-24, 74280-48 & 74280-72 configurations

BOLD MOVES

Spacers direct the path of the strap between fixture and canopy. Pull straps in, push them out or create a parallelogram. Creating visual movement is just one design strategy.

DARE TO PLAY

Choose from 12 preconfigured options for pendants and another 12 for linear versions. Define a single parameter – overall arrangement height – to complement the space. Or customize your own configurations for infinite possibilities. Our team is here to discuss your ideas. [✉](#)

ALL IN THE DETAILS

Construction details matter, especially for delivering a seamless, clean look. Tangram's 4-inch straps flow effortlessly into light fixtures while connections with the canopy are clean and unobtrusive. Lenses details are simple and elegant. With no visible fasteners and a neatly finished top of fixture, Tangram can be used in spaces where it is seen from above.

PLAY WITH SHAPES AND COLORS

Straps come in 5 decorative colors that make your design plans even bolder.

Whether you are looking for a one-color fixture, a monochromatic feel, or a completely eclectic color combo, our team is here to help make your vision come true.

Refer to spec sheets for complete color chart including Pantone matching, RAL & paint color suggestions as well as Eureka's felt color match.
