

**Roof**

 EUREKA

# Enriching spaces

Roof's colorful felted texture, distinctive geometric features, and large rectilinear frame add visual appeal to any space.

Felt color: Deep Teal Green

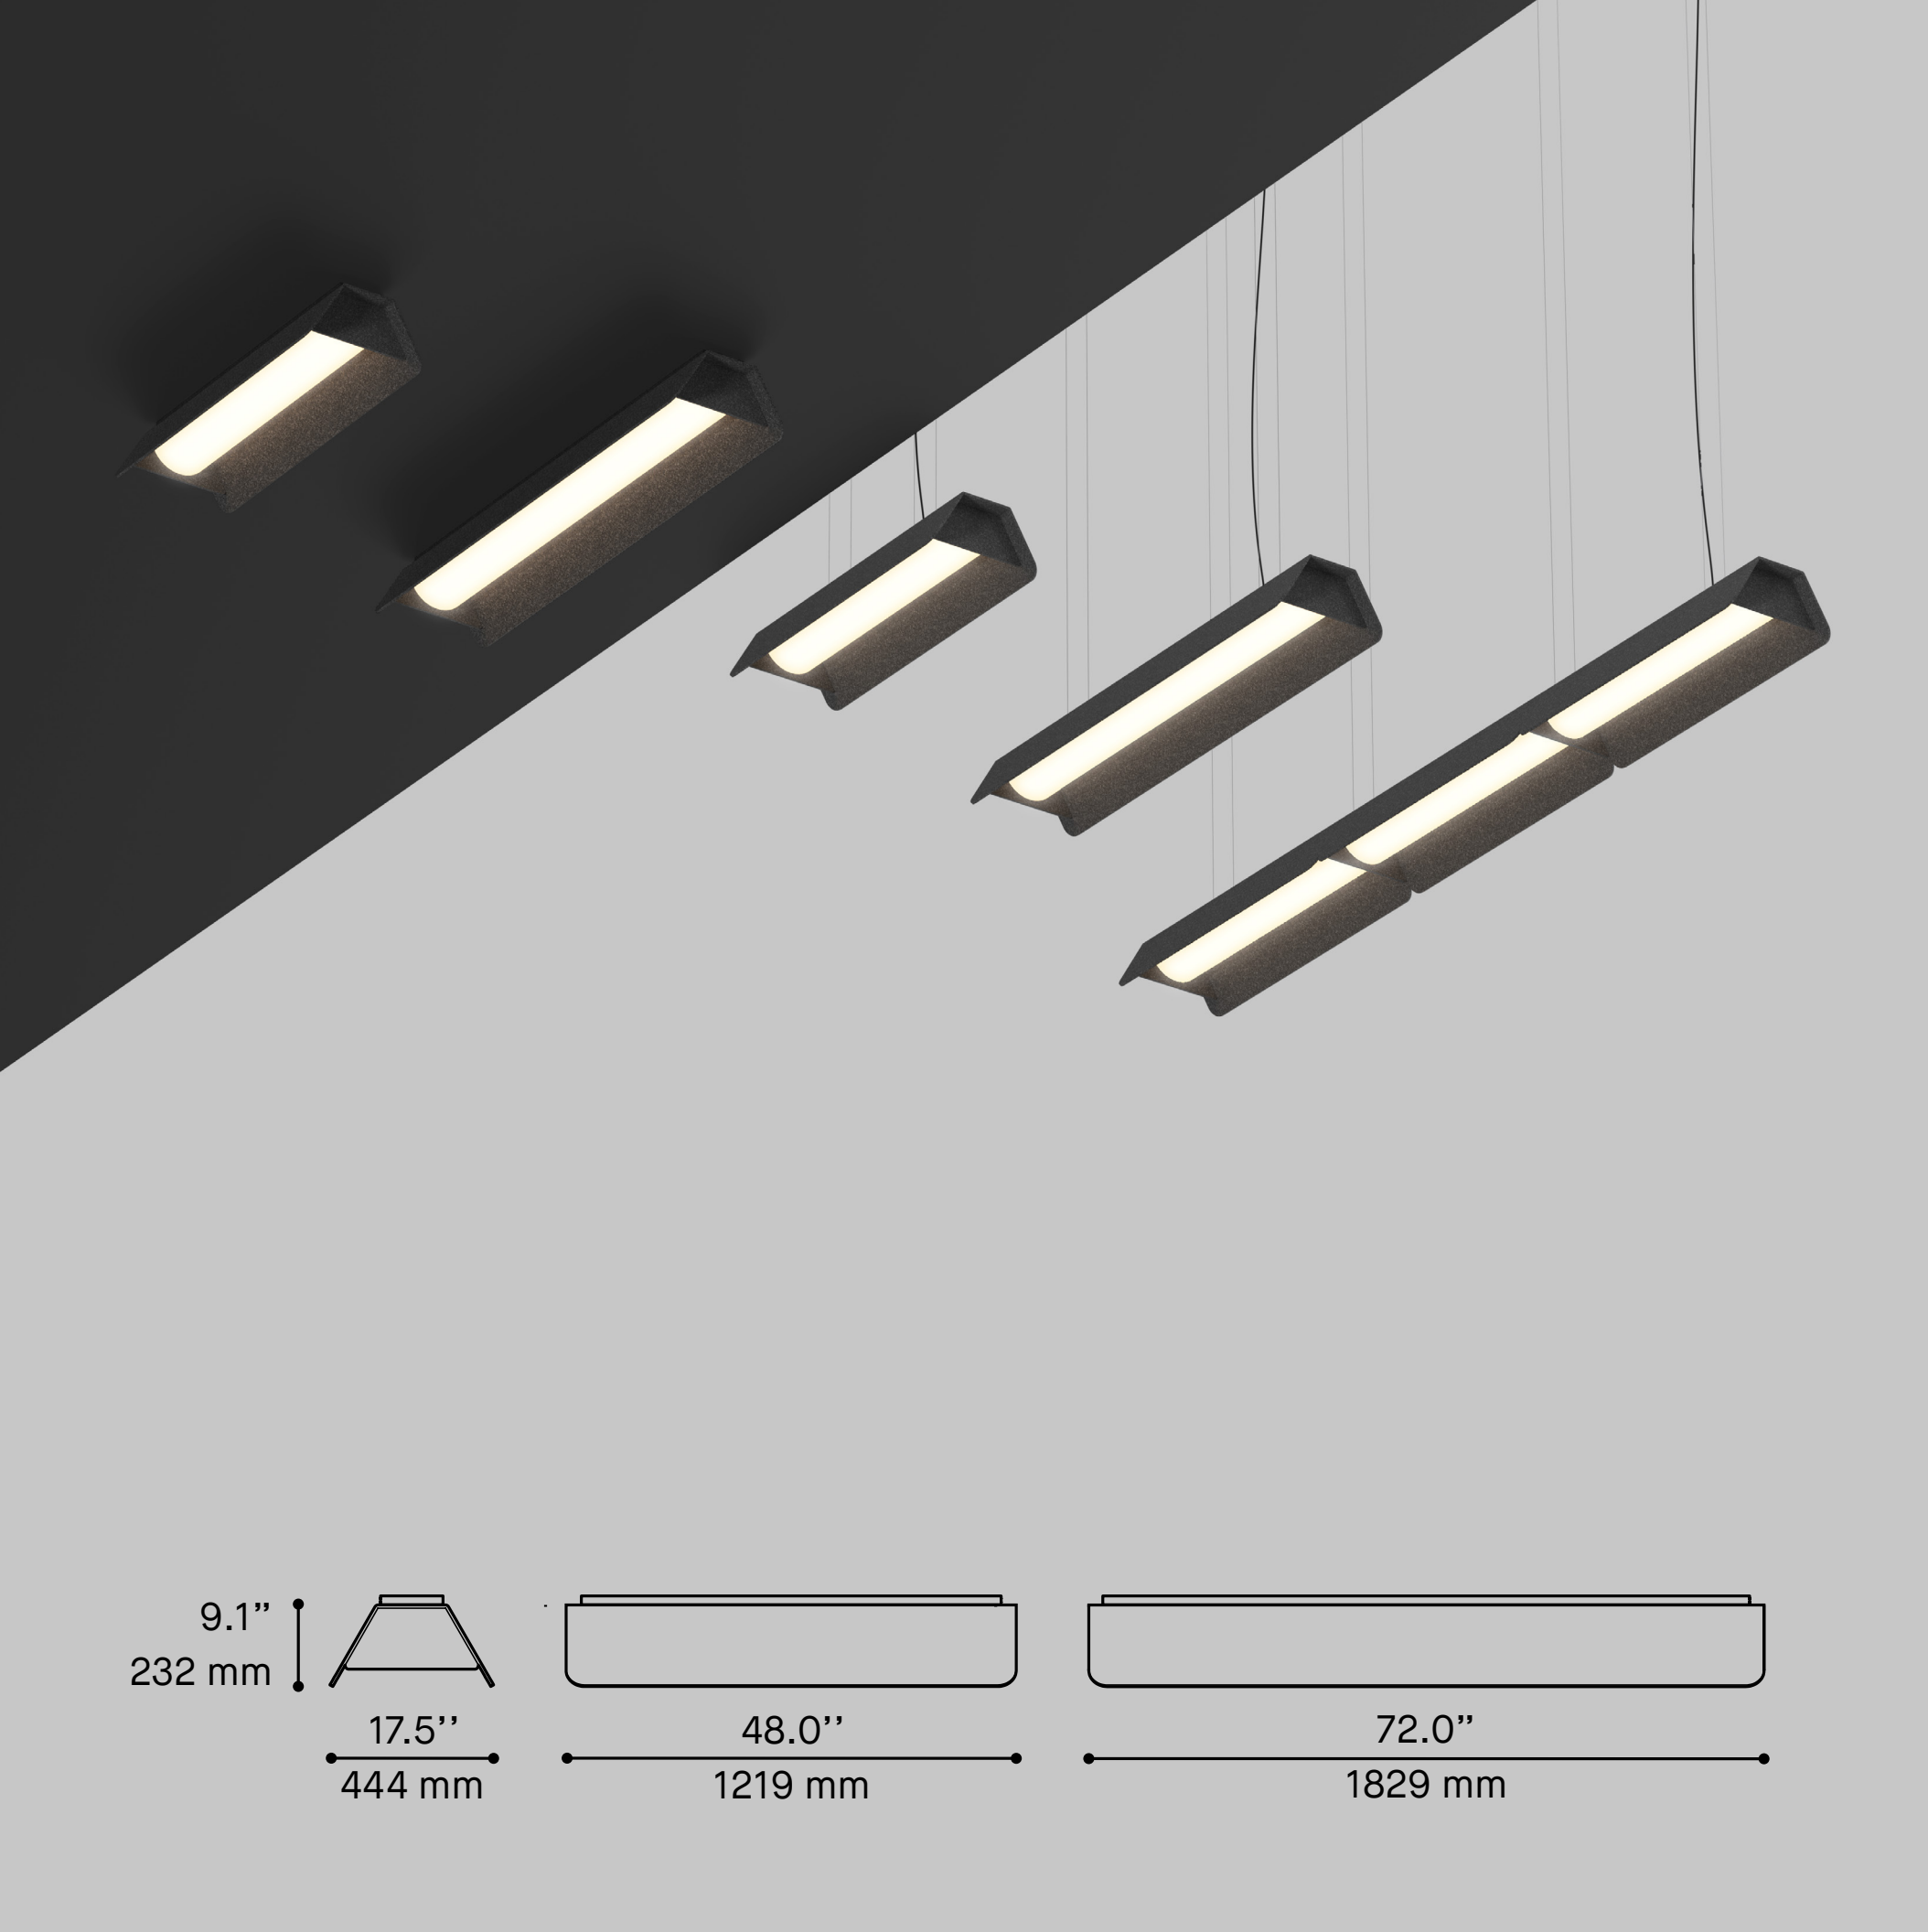

# Accentuated softness

With softened lines and a rounded diffuser nestled inside its shade, Roof holds a room in a cushiony embrace.

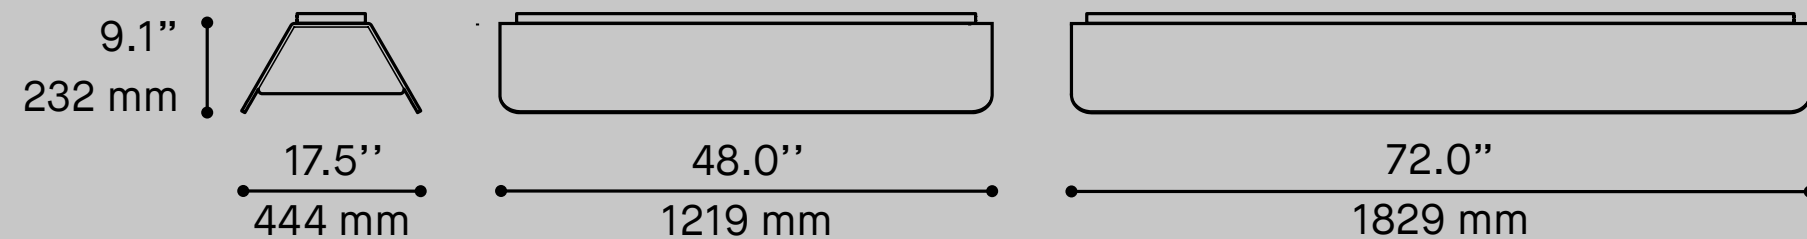

# (Where to) raise the Roof

The choice of 4' or 6' lengths and surface or suspended mounting are available to best fit different application types.

Surface mounting is preferred for lower ceiling applications, such as corridors and small office spaces.

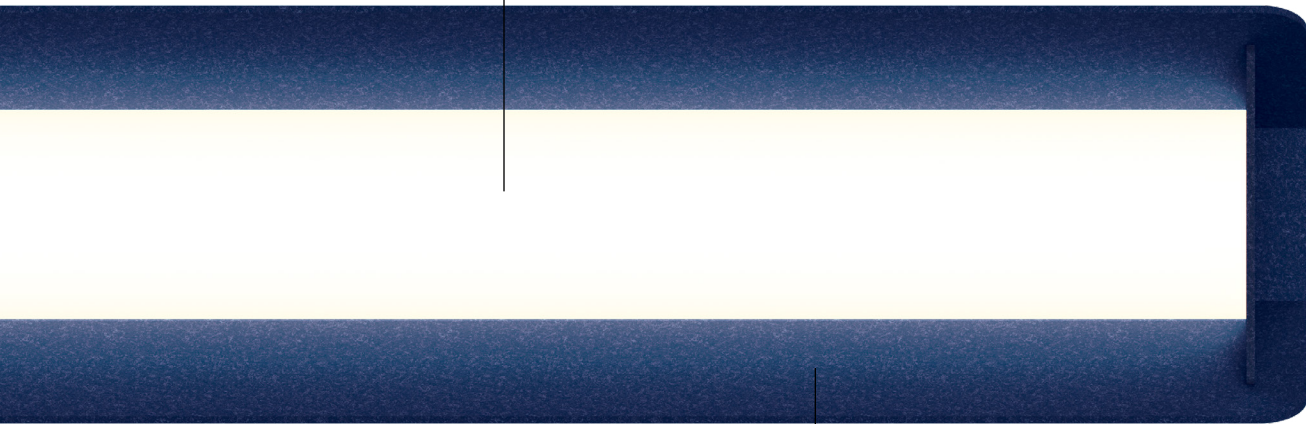

Suspended mounting fits best in open area environments with higher or unfinished ceilings, where designers can take advantage of the scale of the product.

Roof's large diffuser lens provides low-glare illumination that isn't harsh on the eyes when underneath it. Meeting the WELL standards for lighting, Roof delivers good quality of light with minimal glare, flicker, and good color rendition.

Roof offers a direct Lambertian distribution of up to 566 lm/ft.

An acoustic felt frame absorbs reflected sounds in a room. Particularly well-suited for environments with hard surfaces and tall glass windows.

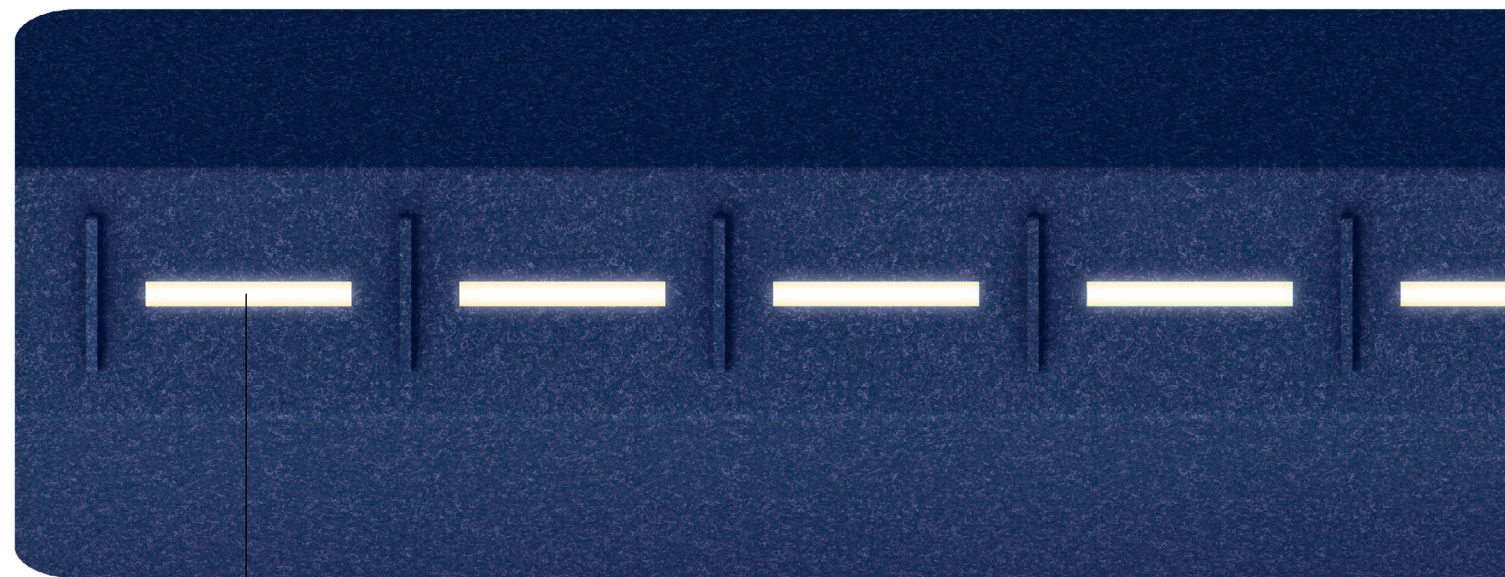

# Designed for comfort

Roof cultivates a focused environment, making it an excellent choice for areas where concentration or collaboration is desired.

Felt color: Silver Gray

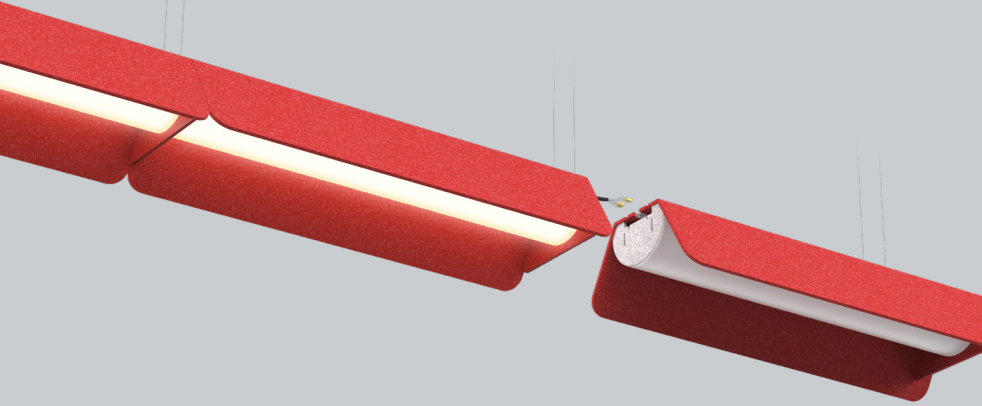

An optional uplight distribution, independently controlled from the downlight, provides softly diffused ceiling illumination. Intended to add extra light to an environment while reducing contrasting surface shadows, this option can make a space appear larger.

Reduced glare indirect illumination of up to 460 lm/ft is gently reflected back into the space. Direct/indirect illumination delivers up to 1,026 lm/ft.

# Joint venture

In environments where more light and sound absorption is needed, multiple Roofs can be installed for end-to-end connectivity.

Felt color: Pinot Noir

Felt color: Blood Orange, Red

# Catch the color craze

With 24 felt color finishes to choose from, including the option of different colored end panels, Roof makes it easy to create playful environments.

14 colored cable options are also available to add to the design.

From matching tones in a vibrant school setting to a company's branded color palette, Roof gives designers countless options to add some fun to a space!
