PRODUCT CHARACTERISTICS CARACTÉRISTIQUES DU PRODUIT

DESIGN:	Dial combines a contemporary shaped, innovative design with a high-performance LED technology. The ultra-thin structure features an invisible rotational mechanism and a magnetic locking friction hinge system. Whether you install Dial on a wall or ceiling, its design will never go unnoticed.
LIGHT SOURCE:	LED module provides 1318 delivered lumens (18W) or 982 delivered lumens (12W). Dimming is standard, type 0-10V (DV) or phase (DP).
OPTIC:	Multiple TIR, available with narrow (18° FWHM) or medium (44° FWHM) beam. Tempered glass masked with black silkscreen printing isolates the optics to improve performance.
STRUCTURE:	Aluminum structure and a custom die-cast heat sink with black fine textured finish. CNC machined aluminum frame available in chrome, white or black architectural grade fine textured finishes.
INSTALLATION:	Effortless installation by means of 2 screws assembled on a deep junction box (3983 – included with product). Designed with a rotating canopy (350°) and high quality friction hinge (angle up to 60°). Dial can stay into the flat position via an invisible magnetic system. No visible fasteners.
CERTIFIED:	c-CSA-us
